Power Play System Q2 Driver Special Instructions

The chart below shows the different configurations possible with all available weights for the Power Play System Q2 Driver. If you know what head weight you need, find your target weight in the chart and look at the appropriate choices for flight bias (if applicable). It will show what weights are needed and where they should be placed in the head. The greater difference between the two screw weights, the more dramatic the effect on flight bias. The addition or subtraction of weight can have positive and negative affects on trajectory and direction, so some experimentation may be necessary. For reference, each additional 2g of weight will be just over a one swingweight point change.

Desired Head Weight (g)	Desired Flight Bias	Heel Port (g)	Toe Port (g)
193	Neutral	3	3
194	Neutral	3	4
194	Neutral	4	3
195	Neutral	4	4
196	Neutral	3	6
196	Neutral	6	3
197	Neutral	4	6
197	Neutral	6	4
198	Fade	3	8
198	Draw	8	3
199	Fade	4	8
199	Neutral	6	6
199	Draw	8	4
200	Fade	3	10
200	Draw	10	3
201	Fade	4	10
201	Neutral	6	8
201	Neutral	8	6
201	Draw	10	4
202	Fade	3	12
202	Draw	12	3
203	Fade	4	12
203	Fade	6	10
203	Neutral	8	8
203	Draw	10	6
203	Draw	12	4
205	Fade	6	12
205	Neutral	8	10
205	Neutral	10	8
205	Draw	12	6
207	Fade	8	12
207	Neutral	10	10
207	Draw	12	8
209	Neutral	10	12
209	Neutral	12	10
211	Neutral	12	12
